Detailed Action

Drawings

The Examiner accepts the drawings filed on September 22, 2000.

Allowable Subject Matter

Claims 1-12, 14, and 16-24 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention generally discloses a trading for an electronic-based market with a model where a trader is designated to enter orders for contracts on behalf of a subscriber. The prior arts of record include the teaching of Mosler et al. (US 6,304,858) and Selleck (US 2001/0049651). Mosler teaches trading and settling a contract having a price based on any preselected interest rate swap curve. On the other hand, Selleck teaches trading instruments for trading new specialized contracts called eContracts, dContracts and oContracts on an open virtual exchange accessible via the Internet. However, the prior arts of record fail to teach, singly or in combination determining which one of a cash based margin protocol or an asset based margin protocol is required by an open position. Furthermore, the prior arts of record fail to teach, singly or in combination determining margin requirements for the open position according to the determined margin protocol.

The examiner agrees with the applicants' arguments and has withdrawn the rejection under 35 USC 103 by Mosler and Selleck. The prior arts of records taken

singly or in combination fail to teach or fairly suggest the claimed invention. Therefore, the examiner favors the allowance of claims 1-12, 14, and 16-24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
